## PROFILE

I am currently employed as a Full Stack Developer at Triad Learning Systems where I have been instrumental in completing comprehensive web development projects using a variety of programming & scripting languages. I graduated from Washington State University where I earned my BA in Management Information Systems (magna cum laude) after attending Spokane Community College earning an AAS in Software Development. I graduated with honors from both schools, and in doing so demonstrated an aptitude for learning (or further refining) my programming, software literacy, business, customer-service, and collaborative skills.

## SKILLS

### BUSINESS

- Responsible
- Collaborates Well with Others
- Ability to Meet Deadlines
- Aptitude for Learning New Skills
- Excellent Customer Service Skills
- Exceptional Organizational Skills
- Proper Phone Etiquette
- Attentive Listener
- Typing Speed (90+ WPM)

### SOFTWARE LITERACY

- Android
- Docker
- Git/Github
- Linux
- Mac OS
- Photoshop
- PhpStorm
- Project
- RubyMine
- SQL Server
- Tableau
- Tower
- Visio
- Visual Studio
- Windows OS
- Word

### CODING SKILLS

- ASP.NET MVC
- Bootstrap 3/4
- C#
- CSS
- HTML5
- JavaScript/jQuery
- Java (Android)
- Laravel
- MySQL
- PHP
- PostgreSQL
- Responsive Design
- Ruby/Ruby on Rails
- SQL
- Symfony
- Visual Basic (VB)
- Vue.js
- WordPress

---

## EXPERIENCE

### PropertySync Technology Group | October 2019 – Present

While working at PropertySync I have been using SQL & SQL Server, Docker, Symfony, Laravel, and VueJS. I have been creating utilities with VueJS for internal users to shorten tedious tasks involved in the process of parsing data needing to be converted from legacy system's database format into PropertySync's proprietary system and database format. I have also been creating the documentation to resolve and troubleshoot technical issues utilizing VuePress. My other responsibilities involve assisting customers with technical issues, and learning about technical challenges specific to property title companies.

### Triad Learning Systems | November 2017 - October 2019

During my tenure with the company I completed a multitude of projects using AWS, Bootstrap 3/4, C#, CSS3, Docker, Git, HTML5, JavaScript, jQuery, Laravel, Linux, SQL, Symfony, VBScript, and Vue. I have maintained an exceptional level of customer service while collaborating with team members on project requirements for front-end & back-end development and have successfully met or exceeded deadlines. I completed thorough documentation for new code features and trained staff on how to use them. On several occasions I have taken initiative to develop code-based solutions to long-standing problems without being asked. My efforts at TLS on my own or as a collaborative effort have had a substantial positive effect on company revenue.
